

Muhammad Mustafa

Full-Stack Web Developer · Frontend Specialist · AI Integration

mustafashafi143@gmail.com | +92 336 3035621 | Nowshera, KPK, Pakistan
[Portfolio](#) | github.com/Mustafashafi | linkedin.com/in/muhammad-mustafa-a946092b1

PROFILE

Highly motivated Computer Science graduate (CGPA 3.49, UET Mardan) with extensive professional experience across four distinct internships — progressing from Frontend Development at DevelopersHub and Apexify Technologies, to Web Development at AI4LIFE, and Full-Stack PHP Engineering at the AI Community Pakistan. My background spans Frontend Engineering, Full-Stack Web Development, WordPress custom builds, System Configuration, Data Management, and AI tool integration. Proficient in React.js, Next.js (basic), HTML5, CSS3, JavaScript (ES6+), Tailwind CSS, PHP, MySQL, REST APIs, and Figma. A proactive, self-driven problem-solver experienced in agile remote environments, passionate about delivering clean, performant, and user-friendly digital products.

SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js (Proficient), Next.js (Basic), Tailwind CSS

WordPress: Custom Theme Development, Plugin Integration, WooCommerce, Performance & SEO Optimisation

Backend: PHP, Node.js (Basic), REST APIs, CRUD Operations, MySQL, XAMPP

UI/UX & Design: Figma (Wireframes, Prototypes, Mobile UI), Responsive Design, Cross-Browser Compatibility

AI & Automation: n8n Chatbot Workflows, Vosk, OpenAI Whisper, GitHub Copilot, Claude API, Gemini, ChatGPT, Antigravity

Tools: Git & GitHub, VS Code, npm, MS Office (Word, Excel, PowerPoint)

Other: OOP (C++, Python), Basic Networking, System Configuration & IT Support

Languages: Urdu (Native), Pashto (Native), English (Professional)

PROFESSIONAL EXPERIENCE

Web Development Intern · [AI4LIFE](#) · Remote

Oct 2025 – Dec 2025

- Developed production-level web applications using Next.js (basic) with reusable and scalable component architecture
- Implemented structured routing and optimised frontend performance for faster load times and improved Core Web Vitals
- Built chatbot automation workflows using n8n and integrated them seamlessly with frontend interfaces
- Collaborated with backend developers to integrate REST APIs and render dynamic data in UI components
- Maintained clean, well-documented code following structured development standards throughout the project lifecycle
- Participated in team discussions, contributed feature ideas, and delivered on tight agile deadlines

Frontend Developer Intern · [Apexify Technologies](#) · Remote

Aug 2025 – Oct 2025

- Built responsive, cross-browser compatible web interfaces using HTML5, CSS3, and JavaScript (ES6+)
- Translated Figma UI/UX design mockups into pixel-perfect, maintainable, and structured frontend code
- Improved UI/UX consistency across pages and optimised loading performance
- Debugged and resolved layout and functionality issues across multiple browsers and device sizes

Frontend Developer Intern · [DevelopersHub](#) · Remote

Jun 2025 – Jul 2025

- Assisted in developing and debugging frontend features for live, production web applications
- Enhanced responsiveness and improved layout consistency across desktop, tablet, and mobile devices
- Worked collaboratively in a structured remote agile team environment and contributed to team code reviews

PHP Full-Stack Intern · [AI Community Pakistan](#) · On-site

Jul 2024 – Sep 2024

- Developed and maintained 9+ PHP/MySQL websites with complete database-driven functionality
- Built CRUD systems, admin panels, user management interfaces, and relational MySQL database schemas

- Managed version control using Git and collaborated with the team using agile methodologies
- Delivered clean, maintainable backend and frontend code following PHP and web development best practices

EDUCATION

BS Computer Science — CGPA: 3.49 / 4.0 · UET Mardan · Mardan, KPK Oct 2021 – Oct 2025

- Relevant coursework: Software Engineering, Artificial Intelligence, OOP (C++ & Python), Database Systems, Computer Networks, Web Technologies, Data Structures & Algorithms
- Final Year Project: Hifz Master — AI-powered Quran recitation correction system using Vosk & OpenAI Whisper speech recognition

FSc Pre-Engineering / Computer Science · Iqra College Jehangira · Jehangira, KPK 2016 – 2021

- Completed with strong results in Mathematics, Physics, and Computer Science

WORDPRESS PROJECTS

Skyrasoft — WordPress — Custom Build

skyrasoft.com

- Professional technology services website with custom theme, performance-optimised pages, and conversion-focused layout
- Implemented responsive design, plugin integrations, and SEO-friendly page structure

Facelt Analyser — WordPress — Custom Build

faceitanalyser.net

- Gaming analytics platform with dynamic data display, custom interactive layouts, and optimised cross-device UX
- Integrated third-party data sources and customised WordPress theme for a data-driven user interface

Skynish — WordPress — Custom Build

skynish.com

- Modern business website with clean responsive design, fast-loading pages, and polished UI
- Focused on performance optimisation, visual consistency, and mobile responsiveness

WEB APPLICATION PROJECTS

Task Manager Web App — React.js / Tailwind CSS / Node.js / REST API

[Live Demo](#)

- Full-stack task management app with complete CRUD functionality and REST API integration
- Features a responsive dashboard UI, task creation/editing/deletion, and real-time status tracking

AI4LYF Website — React.js / Next.js (Basic)

[Live Demo](#)

- Production company website with scalable component architecture, structured Next.js routing, and API integration
- Built during AI4LIFE internship — shipped to production with full cross-device responsiveness

Kanban Board — React.js

[Live Demo](#)

- Interactive drag-and-drop task board with To Do, In Progress, and Done columns
- Demonstrates complex React state management, event handling, and dynamic UI interactions

Flow Landing Page — React.js / Tailwind CSS

[Live Demo](#)

- Modern, responsive landing page with reusable component architecture and mobile-first design

Landing Page — React.js / Tailwind CSS

[Live Demo](#)

- Clean, fully responsive landing page with pixel-accurate UI and reusable component design

Portfolio Website — Next.js (Basic)

[Live Demo](#)

- Dynamic personal portfolio showcasing all projects, skills, and internship experience with live links

Library Management System — PHP / MySQL

[GitHub](#)

- Full-featured book management platform with CRUD operations, user authentication, and admin controls
- Built relational MySQL database schema integrated with PHP backend and responsive frontend

AI & SYSTEMS PROJECTS

Hifz Master — AI Speech Recognition — Python / Vosk / OpenAI Whisper

[GitHub](#)

- Final Year Project: AI-powered Quran recitation correction system using Vosk and OpenAI Whisper LLM-based speech recognition
- Installed, configured, and integrated speech recognition models into a complete Python processing pipeline

- ▶ Managed local datasets, performed system-level testing, debugging, and performance tuning
- ▶ Demonstrates hands-on experience with LLM audio processing, AI integration, and system-level programming

Library Management System — C++ / OOP

- ▶ Console-based system demonstrating OOP principles: classes, inheritance, encapsulation, and polymorphism
- ▶ Includes data handling, file I/O operations, and a structured menu-driven interface

AI4LYF Mobile App UI Design — Figma

[Figma Design](#)

- ▶ Designed modern, user-friendly mobile application screens in Figma
- ▶ Focused on clean UI design, visual hierarchy, consistency, and usability across all screens
- ▶ Delivered wireframes and high-fidelity prototypes ready for developer handoff

Clinic Management System — Figma

[Figma Design](#)

- ▶ Designed a full clinic management system UI in Figma covering patient records, appointments, and doctor workflows
- ▶ Emphasised clean navigation, medical UI conventions, and cross-screen consistency throughout the design

College Management System — Figma

[Figma Design](#)

- ▶ Designed a comprehensive college management system UI in Figma with modules for students, faculty, and administration
- ▶ Focused on clean layout, visual hierarchy, and intuitive navigation across all system screens

Skyrasoft Website Design — Figma

[Figma Design](#)

- ▶ Designed the full website UI for Skyrasoft in Figma — the same site later built and deployed as a live WordPress project
- ▶ Delivered pixel-accurate layouts with responsive breakpoints, component consistency, and developer-ready prototypes

CERTIFICATIONS

React & Redux · YouTube Course

2024

Become a Python Master · Programiz — Professional Certificate

2024
